

SPX25 DROP PLOW

REMOTE CONTROL. A remote control gives you 360-degree control of the machine, providing greater maneuverability on tight jobsites, as well as visibility to the complete worksite and to avoid potential obstacles or obstructions that may be difficult to operate with conventional controls.

COMPACT SIZE. A narrow width of 34.5" (87.6 cm) and length of 81" (205.7 cm) allows you to enter gated yards and install utilities in tight jobsites.

DECREASE TURF DISTURBANCE. Dual rubber tracks with a ground pressure of 3.7 psi (.3 bar) minimize disturbance and restoration to the jobsite while tackling tough ground conditions. This lightweight plow will also help save time with a 3.7 mph (6 km/h) transport speed.

OPTIONAL REEL CARRIER. Add an optional reel carrier for increased productivity and efficiency.

PORTA BORING. Easily transition from plowing to boring under driveways, sidewalks and other obstacles with an optional Porta Bore attachment.

INCREASED VISIBILITY. Allows the operator to have a full, unobstructed view of the machine and product installation.
